

TASKS WEEKLY REPORT

ICT DEPARTMENT

DUE DATE: 30 JUNE 2023

RESTFUL APIs - Done

Mbuso and I have been working closely with Mr Itumeleng, learning new concepts in the ICT department that will enable us to carry out tasks effectively. We have been learning about restful APIs, how we can create and consume them in our projects. These sessions were so insightful, not only did we learn about how to create and consume them. We also learnt their importance in our industry as well as their benefits.

Digital Skills Training - Done

The last 2 days of the week we have been in different places in Mpumalanga where we were providing skills training to young individuals. We were teaching them how to use their devices to stay connected with the world, being able to search for opportunities online and at the tip of their fingers. The main focus is providing soft skills to young people so that they can learn to navigate into job and financial opportunities.

Conclusion

The department is learning immensely from all the activities we have been doing.
